

# DIE GOLDENE STADT

## Additional variant for 2 players

*The following addition can be included when playing 'The Big Drought' variant.*

### Preparation

- The players cannot choose black as their colour.
- In addition to his businesses, each player takes two black businesses.

### Playing the game

#### 4. Building businesses

**Note:** No more than two businesses can ever be built in a part of the city.

A player can only build a black business under the following conditions:

- it can only be built in a part of the city
- the player must already have built a business of his own colour in that part of the city
- there cannot be a business belonging to the other player in that part

To build a black business a player must play cards from his hand as usual.

A player can build up to two black businesses in a turn (in different parts of the city) – players are still limited to building no more than two businesses in a turn.

#### 5. Scoring and Special scoring

A black business is counted by the player who built it, as if it was one of his own colour.

*Note: A player can thus use the black businesses to block access by the other player to parts of the city.*
