At first the Christmas Tiles have to be cut out. Best glue before on cardboard, then using ruler and cutter.

The rules of **Mondo** apply with the following additions. Place before a turn the two Christmas Tiles face up in the middle, seperated from the other tiles, so that they can't be mixed up by mistake.

A Christmas Tile can be placed like a regular tile on your world board. But this has to be your last tile in a turn! If all edges match to the neighborhood you get as bonus 5 points for the Christmas Tree and 10 points for the Reindeer. In a turn a player is allowed to place just one Christmas Tile. It is not mandatory to take any Christmas Tile.
