**Preparation:** Place the enclosure with the Iberian Lynx face-up in the middle of the table.

**Playing the game:** All rules of the original game apply with the following changes:

The **first player** who fills his **6-space enclosure** takes the enclosure with the Lynx as a bonus\* and places it below his zoo board, near his barn.

The Lynx enclosure remains with this player until the end of the game. The player may place no other tiles in the Lynx enclosure.

At the end of the game **after** the last truck has been taken and before scoring the owner of the Lynx enclosure may carry out **one** money action. He must pay the cost for the action as usual.

\*If Lynx is played with Gorilla, Polar Bear, and/or other similar expansions, the first player may choose which enclosure to take. Other players choose from the remaining enclosures when filling their own 6-space enclosure.
